

» Payroll

A custom Yardi Add-on by FitechGelb

Make double entries a thing of the past.

If your payroll company can provide a file with the details of your payroll, then this module can automatically book the necessary entries into your general ledger without any additional effort.

Take the 'pain' out of payroll.

You already give your payroll company the details of each paycheck. Why should you have to re-enter the same information? This module will read the contents of your payroll file and create payables and checks or journal entries as desired.

Work smarter.

- Automatically book cash deducted from your bank accounts for payroll checks.
- Manages expense and cash allocations based on your Payroll setup.
- Creates intercompany relationships based on payroll departments, employee ID's and deduction codes.
- Books payroll expenses as either payables/checks or journal entries.

Innovative.
Effective.
World-class.

We take you beyond
the buildings and into
the cloud.

Our Real Estate Consulting services provide you the valuable insights and data that guide your business decisions to a winning strategy. Find out how we can help you achieve your vision for your Real Estate business.
