

» Report Packet Launcher

A custom Yardi Add-on by FitechGelb

Save time, enhance functionality.

Report Packet Launcher is a plugin enhancement to Yardi's standard Report Scheduler functionality that enables running and sending a report packet to one or more properties in a distribution member's property list. Enjoy greater flexibility in sending reports in real time, as closings and financials are finalized.

Easier. Faster.

- Display existing report packets for your distribution members, then select the properties for which to send packets.
- Run reports simultaneously with one click to deliver to distribution members.
- Report Packet Launcher uses existing Report Packet, Property List and Distribution Member data from Yardi Report Scheduler. No additional setup is required.

'Flexible' is our middle name.

No more waiting until all property reports are completed to process report packets, and no more sending out multiple packets for a single property. Process packets on your completion timeline, property by property.

Innovative.
Effective.
World-class.

We take you beyond
the buildings and into
the cloud.

Our Real Estate Consulting services provide you the valuable insights and data that guide your business decisions to a winning strategy. Find out how we can help you achieve your vision for your Real Estate business.
