

Payment Buddy

A custom Yardi Add-on by Gelbgroup Consulting.

Simplify. Integrate.

Payment Buddy leverages your bank's payment network to speed payments, reduce labor-intensive processes, and exchange critical transactional information.

Using the Payment Buddy module developed by Gelbgroup, integration with payment processors is simple. This Yardi add-on creates the payment file which is transmitted to your bank or other institution for processing. The module supports a wide variety of payment methods.

Streamline your payments.

Use Yardi's standard payment processing function to create records that will be included in the payment file. Exclude payments from the file that should not be processed and let the automation do the rest. Gelbgroup offers a Bank Reconciliation module which allows you to automatically clear payments within Voyager after they have been processed.

Work more efficiently.

Automatically transmit a file from Yardi Voyager for payments to be issued. Allow Gelbgroup to handle the file integration and do the heavy lifting for you!

**We Empower.
We Create.
We Inspire.
Since 1996.**

We can help maximize the return on your Yardi investment. With more than 25 years of invaluable insights, our industry experts will help you work smarter, more efficiently and with better results.
